Huntley Disposal Expands Dumpster Rental Service Across Kansas City Metro Area

January 15, 2026

January 15, 2026 -
Huntley Disposal has expanded its comprehensive dumpster rental services to serve additional communities throughout the Kansas City metropolitan area, addressing growing demand for reliable waste management solutions across both Missouri and Kansas markets.

The Kansas City-based waste management company now provides roll-off dumpster rentals to ten cities including Smithville MO, Liberty MO, Lee's Summit MO, Gladstone MO, Saint Joseph MO, Overland Park KS, Olathe KS, Parkville MO, and Platte City MO, in addition to its established Kansas City operations. The expansion enables residential and commercial customers across the metro area to access professional waste disposal services for projects ranging from home renovations to large-scale construction.

Huntley Disposal offers five dumpster sizes to accommodate various project scales: 10-yard, 15-yard, 20-yard, 30-yard, and 40-yard containers. The 10-yard units suit small-scale residential cleanouts, while the 15-yard dumpsters work well for home remodeling projects. Mid-sized renovations typically require 20-yard containers, and the 30-yard and 40-yard options serve major construction and demolition projects.

"Expanding our service area allows us to meet the growing waste management needs of communities throughout the Kansas City region," said David Finke, Operations Manager at Huntley Disposal. "Each community has unique disposal requirements, from residential renovations in Liberty to commercial construction in Overland Park, and our range of dumpster sizes ensures we can handle any project scope."

The company's roll-off dumpster rental service includes delivery and pickup, with standard rental periods of up to seven days. Huntley Disposal in Kansas City handles disposal of diverse waste materials including construction debris, yard waste, furniture, appliances, and general household items. The company also provides specialized disposal services for items such as mattresses, electronics, hot tubs, and materials from foreclosure cleanouts.

The expansion comes as construction and renovation activity increases across the Kansas City metro area. Local building permits have risen steadily, creating demand for professional waste management services that can handle both residential and commercial projects efficiently.

"Professional waste management is essential for maintaining clean, safe job sites and ensuring proper disposal of materials," added Finke. "Our expansion means contractors and homeowners throughout the metro area now have access to reliable dumpster rental services that keep projects moving forward without waste management delays."

Each dumpster rental includes transportation to and from the customer's location, with additional days and weight beyond standard limits available for supplemental fees. The company coordinates delivery timing to align with project schedules, helping customers maintain organized work sites throughout their projects.

Huntley Disposal specializes in providing waste management solutions for the Kansas City metropolitan area. The company offers comprehensive dumpster rental services for residential, commercial, and construction projects, with a fleet of roll-off containers ranging from 10 to 40 cubic yards. Founded to address the region's waste disposal needs, the company serves multiple communities across Missouri and Kansas with professional waste removal and disposal services.
